Atoma marketing copy — fitted to the Dispatch layout

Original copy written for Atoma Labs / Ares — SpecOps, sized to each slot in the layout at https://gentle-situation-101376.framer.app/ (same Dispatch template structure as the earlier site). Nothing here copies the template's own copy. Items marked [FILL] have no verified figure yet — do not publish them with invented numbers or names.

Added 2026-11-04 per Stewart's choice: the 7-layer stack below, placed in this site layout, under the Atoma Labs logo (logo file: workspace/user/media_library/image/Screenshot_2026-11-04_at_1.35.55_AM.png — atom/orbit mark, "Atoma Labs / Principled Intelligence"). The stack's 4 hero layer cards in section 2 are template slots, not this stack — do not confuse the two.

1. Header / nav

- Links: Home, About, Updates, Blog
- Button: GET STARTED

2. Hero

- Eyebrow: Built for engineering teams
- Headline: One mind. Every engineering job.
- Subhead (24 words): Atoma connects your research, code, and knowledge into one judged mind map. It retrieves, checks, and acts on real evidence — with you in control of every step.
- Buttons: GET STARTED / PLAY VIDEO
- Layer cards:
  - 01 Connect Layer — Plugs into your docs, code, and research. Captures every source with provenance. Nothing enters the map unjudged.
  - 02 Action Layer — Runs real tool calls and system updates. Every action is receipted. Failures show their cause, not just an error.
  - 03 Control Layer — Policies, approvals, and audit gates. Sensitive actions wait for a human. The automaton watches, it does not freelance.
  - 04 Context Layer — Structured memory from one map. Recalled atoms carry their source. Context improves with use, not with hope.
- Trusted-by strip: [FILL — logo files needed, no logos invented]

3. Overview (about 30 words)

Atoma is a shared, judged mind for engineering work — one hyperbolic map, built from many models, that retrieves atoms, verifies them, and acts on them. It keeps the team in control while the repetitive work gets done once, properly.

- Workflow strip:
  - 01 SOURCE CONNECT — Connect sources with provenance attached.
  - 02 ACTION RUNNER — Execute updates, tasks, and notifications.
  - 03 APPROVAL GATE — Require approval for sensitive actions.
  - 04 AUDIT + INSIGHTS — Track changes and spot patterns.

4. Section anchors

Capabilities, Numbers, Features, Integrations, Pricing, Testimonials, Insights, FAQ

5. Capabilities

- Eyebrow: Capabilities
- Headline: Four layers that map, judge, and execute.
- Subhead: Atoma connects your stack, applies policies and approvals, and keeps automation safe. One map, one governor, every action receipted.
- Cards:
  - CONNECT — Plug into docs, code, and research in minutes.
  - RESOLVE — Turn each request into a completed, evidenced outcome.
  - CONTROL — Set policies, approvals, and routing for safety.
  - ANALYZE — See what works, what is risky, and what to automate next.

6. Numbers

Use only verified Atoma counts here. Do not use the template's numbers.

- Panel A: UNIFIED MAP — 1 map, 12 basins, 5 models distilled into it.
- Panel B: [FILL — throughput figures only after a hardware run with receipts]
- Panel C: [FILL — automation coverage only after a measured run]
- Qualifier line: With policies + approvals.

7. Features

- Eyebrow: Features
- Headline: Core systems that power every run.

- Subhead: Real-time retrieval, judging, and action across your work — so speed never costs you the evidence.
- 001 Context Assembly — Unify docs, code, and research into one structured, source-grounded view.
- 002 Policy & Approvals — Configurable rules, review of sensitive actions, and alignment with your standards.
- 003 Action Execution — Trigger real updates, modify records, and complete system actions with full audit visibility.

8. Integrations

- Eyebrow: Integrations
- Headline: Connect Atoma to the tools you already use.
- Subhead: Direct integration with your core stack, so Atoma can retrieve real data and trigger real workflows.
- Tabs: DOCUMENTATION, COMMUNICATION, SUPPORT & HELPDESK, CRM & REVENUE
- Cards: [FILL — list only integrations actually built; do not present template placeholder brands as real]
- Badges: Bidirectional / Secured by default / Context-aware

9. Pricing

- Eyebrow: Pricing
- Headline: Simple plans that scale with you.
- Subhead: Free for contributors. Paid for consume-only use. Pricing grows from first runs to enterprise scale.
- Toggle: MONTHLY / ANNUAL
- Tiers:
  - CONTRIBUTOR — Free. For builders who contribute to the shared mind.
  - TEAM — [FILL — price]. For teams running judged agentic work daily.
  - ENTERPRISE — Custom. For orgs needing advanced security and scale.
- Comparison rows: Seats, Runs per month, Integrations, Auto-resolve, Agent assist, Workflows, Sequences, Email support, Priority support, Dedicated CSM — [FILL values per tier]
- Buttons: GET STARTED / GET STARTED / TALK TO SALES

10. Testimonials

- Eyebrow: Testimonials

- Headline: What our partners say about Atoma.
- Subhead: Trusted by builders who need visibility, structure, and control across hard engineering work.
- Quote slot: [FILL — real quote only, with real name, role, and company. No invented testimonials.]
- Rotation: 5 testimonial slots, each with quote + name + role/company + headshot.

11. Blog / Insights

- Eyebrow: Blog
- Headline: Articles, notes, updates, and case studies.
- Subhead: Insights on judged minds, automation design, and systems built to last.
- Cards (titles only, 10–12 words each):
  - Why retrieval alone fails, and what a judged map changes
  - From prompt to mechanism: building automation you can audit
  - The hidden cost of context loss in long engineering runs
- Category: Updates. Dates: [FILL]

12. FAQ

- Eyebrow: FAQ
- Headline: Frequently asked questions.
- Help panel: STILL HAVE QUESTIONS? / WE ARE HERE TO HELP — For complex workflows or custom integrations, talk to us. Button: CONTACT US
- Questions and answers:
  1. Do I have to train the model? — No. Atoma retrieves and judges from your map and sources; training is not the mechanism here.
  2. What does Atoma connect to? — [FILL — only tools actually integrated]
  3. What control do I keep? — Policies and approvals decide what runs automatically and what waits for you.
  4. Is my data safe? — [FILL — only state controls actually in place; do not claim certifications not held]
  5. How long does setup take? — [FILL — only after a timed setup run]
  6. What is Atoma, in one line? — A shared, judged mind for engineering work, distributed as a brain that attaches to your setup.

13. Closing CTA

- Eyebrow: Ready to build with Atoma

- Headline: Build once. Prove it. Ship it.
- Subhead: Connect your stack, set your guardrails, and let Atoma handle the repetitive work while you stay in control.
- Button: GET STARTED

14. Footer

- Wordmark: Atoma
- Description: Atoma Labs builds Ares — SpecOps, a judged engineering mind that retrieves, verifies, and acts — with receipts, and with you in control.
- Columns: PAGES — Homepage, About, Updates, Waitlist, Blog, 404. SOCIAL — [FILL real links only]
- Status panel: [FILL — only if a live status feed exists]
- Bottom bar: © Atoma Labs, 2026. All rights reserved. Terms of use. Privacy Policy.
